### DETAILED ACTION

Applicant's election with traverse of claims 1-5 in the reply filed on 6/03/05 is acknowledged. The traversal is on the ground(s) that (1) "the claims of Groups I and II are so inextricably interrelated that either group of claims cannot be comprehensively examined without also searching those areas in which the other group is classified. The claims in Groups I and II are commonly related to a magnetic field sensor" and (2) the cumulative fees would total more than \$9,000. This is not found persuasive because as to (1), two or more related inventions are restrictable as long as they are distinct (it is noted that "inextricably interrelated" is not a basis for restriction requirement). The groups are distinct (see the restriction requirement); therefore, the restriction requirement is proper. With respect to the argument that the "claims cannot be comprehensively examined without also searching those areas in which the other group is classified," Examiner opines that so many limitations of group II claims need not be examined and searched when the invention of group I is examined; for example, "etching," "removing the photoresist," etc. As to (2), the fees or costs in acquiring and maintaining a patent are not factors in the consideration of restriction requirement. The requirement is still deemed proper and is therefore made FINAL.

This application is in condition for allowance except for the presence of claims 6-12 to an invention non-elected with traverse in the reply filed on 6/03/05. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to

cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

***The prosecution of this case is closed except for consideration of the above matter.***

***Examiner's Statement of Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The prior art of record does not, alone or in combination, disclose a core formed in a semiconductor substrate and a drive line for exciting the core by directly applying an electric current thereto.
